Subject: Feedback to Project # 3028516

Hello,

I received a Notice of Application for project # 3028516.

Currently the trees on the property provide for hill and soil stabilization. My primary concern is if too many trees and plants are removed, there will be an increase in water/soil run off down the hill into our property.

The trees also provide homes to many birds and families of raccoons. If the too many trees are removed, the animals will be without homes. In addition, the large trees on the property up for subdividing provide privacy among homes that also give us our neighborhood name Pinehurst.

Please include me in public meetings, hearings, and decisions with information on the right to appeal.

Regards,

Grace Yeung
